

PRATIK HYTECH

WORKS PVT. LTD.

PUSH RODS

The pushrod also functions as a portal for transferring lubricating oil through the valve lifter and up to the cylinder head. This is quite a basic function, since the pushrod only acts as a pipe. It's everything else the pushrod does that has a critical impact on its design.

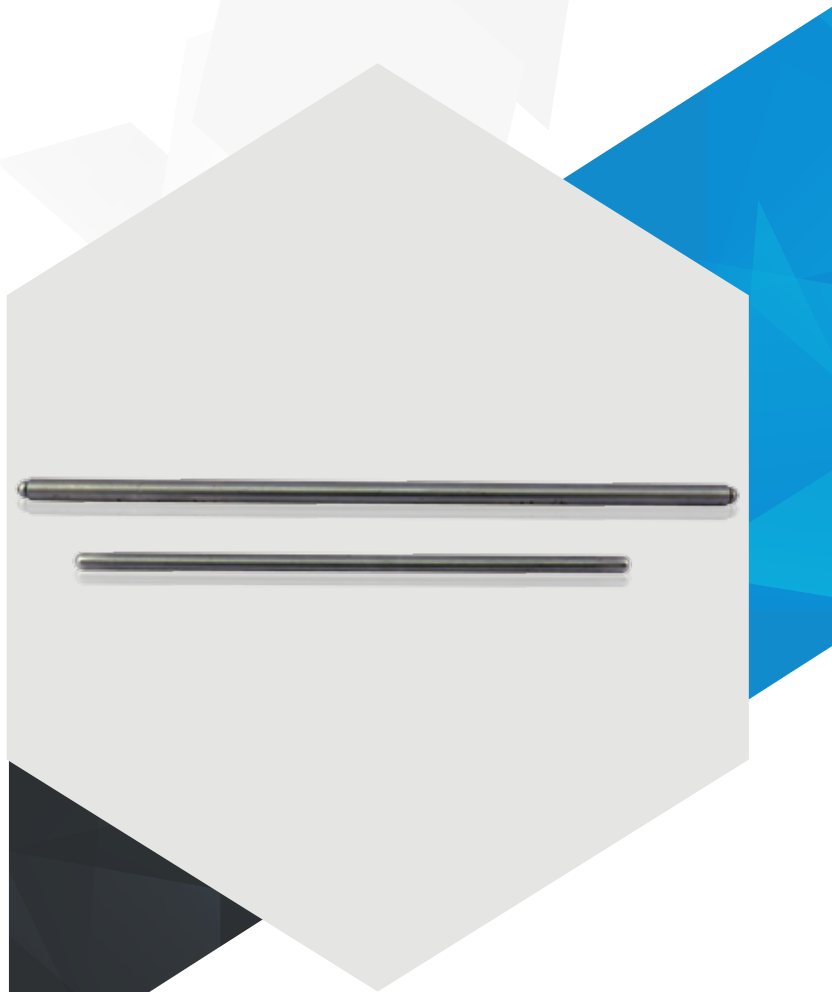

Pushrods are made in a variety of types to match the engine and valvetrain designs out there. These types differ most with respect to their dimensions

MATERIALS

CEW STEEL TUBE

PRODUCTION

100000 PCS./MONTH

 Plot No.G/1603, Near Telephone Exchange,
Road No. 5, Metoda G.I.D.C., Rajkot, Gujarat 360021
